DETAILED ACTION

Applicants' response of 1/30/07 has been considered with the following results.

Information Disclosure Statement

The IDS documents filed on 11/30/06 and 3/13/07 have been reviewed and made of record.

Specification

The amendment to the title of the invention is greatly appreciated.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

1. Claims 6 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As presented, independent claims 6 and 9 are drawn to an optical disc recording/reproducing (interpreted as a recording or reproducing) apparatus. However, only a single element (means) is recited.

The majority of the claim recites the disc structure, while the ultimate paragraph in either independent claim recites the desired result. Hence at best this is a SINGLE means claim – and suffers accordingly – see *In re Hyatt 218 USPQ 195*.

Response to Arguments

Applicant's arguments filed 1/30/07 have been fully considered but they are not persuasive. As interpreted by the examiner the independent claims still fail as noted above. The dependent claims additional fail as indicated below.

2. Claims 7,8, 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Dependent claims 7,8,10 and 11 attempt to further define the single means/element parent claim by introducing a tilt controller – and function thereof; however, there is no clear element/means defined in either the parent of the dependent claim that yields either the “average” of the medium tile, nor the “closest tilt detection area”. That is the dependent claims introduce a controller which functions/is responsive to the above criteria, but no element/means is recited that yields such criteria.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
